TOTAL (main thesis)	61	19794	161	22	8	63

YES: Your thesis meets the word-count requirement.

Word count (19,794) is within the acceptable 13,500–19,800 range – outside the ideal 15,000–18,000 target, but acceptable.

Acceptable range: 13,500–19,800 words (ideal target: 15,000–18,000). This verdict is decided by the word count only; the page count is reported below and does not affect it. Front matter, appendices and the bibliography are excluded from the word total.

Placeholder chapters (fewer than 50 words) are shown with a dash and excluded from all totals. The Pages column shows EFFECTIVE content pages (blank/filler pages excluded); front matter is listed for reference and excluded from every total.

Page Breakdown

Page counts read directly from the compiled `main.pdf`. Blank and filler pages (the empty versos an openright book inserts) are excluded from the chapters figure and folded into “everything

else”.

Section	Pages
Chapters 1–12 (content only, blank pages excluded)	61
Everything else (front matter, part dividers, appendices, bibliography, blank pages)	50
Total thesis pages	111

Appendix Statistics

Appendix	Pages	Words	Citations	Figures	Tables	Footnotes
Ethics, Boundaries and Limitations*	4	1418	0	0	0	0
Study Protocols*	4	1254	2	0	1	0
Code and Reproducibility*	5	1117	1	0	1	1
<i>Subtotal — Appendices</i>	<i>13</i>	<i>3789</i>	<i>3</i>	<i>0</i>	<i>2</i>	<i>1</i>

* *Appendices are reported for reference only and are excluded from the main thesis length calculation.*

Bibliography

Total references in `references.bib`: **124**.

The bibliography is reported separately and does not count towards the thesis word or page totals.
